PROFESSIONAL SUMMARY

- Software Developer with experience in Laravel, Vuexy, React JS, VB .Net, and Firebase. Built and improved back-office systems, a driving school management system, and a medical system upgrade. Developed ProxAlert, a mobile emergency assistance app with real-time tracking.
- Scored 91/100** in my probationary evaluation for learning fast, following instructions, and delivering quality work. Focused on clean code, performance, and usability.

SKILLS/EXPERTISE

Programming	Python, Javascript, PHP
Frameworks / Libraries	ReactJS, Django, Laravel, Expo
Web & Databases	HTML, CSS, Firebase, Postgresql
Tech	Git, Figma, VSCode

EXPERIENCE

Junior Software Developer (Fullstack)

Vox Dei Protocol System Inc
Aug 2024 - Feb 2025

- Developed and maintained web and desktop applications based on business requirements.
- Designed and implemented database structures to optimize performance and security.
- Debugged and optimized application performance for better efficiency.
- Worked closely with cross-functional teams to deliver software solutions.

Technical Support (Internship)

Military Police Battalion CSMG, GHQ & Headquarters Service Command, AFP
Jun 2023 - Aug 2023

- Managed and maintained the violator database, ensuring data accuracy and security.
- Provided technical support for software and hardware concerns.
- Assisted in documentation and report generation for technical projects.

PROJECTS

Medical System

Company Project | October, 2024 | Laravel, Vuexy

- Migrated the backend from the old version, ensuring compatibility with Vuexy's latest updates.
- Redesigned and modernized the UI/UX to enhance usability and accessibility.
- Conducted functional and performance testing to ensure a seamless upgrade.

Vox Dei Back Office System (Additional Module)

Company Project | September, 2024 | VB .Net

- Developed new modules for the company's existing back office system.
- Implemented queries and stored procedures for efficient data handling.

Driving School Back Office System

Company Project | August, 2024 | Laravel, Vuexy

- Implemented role-based access control, and managed database transactions.
- Designed and integrated a responsive admin dashboard for tracking driving schools and managing users.
- Structured and optimized the database for efficient record management.

ProxAlert

Thesis Project | June, 2023 - Jan, 2024 | Expo, Firebase

- Developed and Design an intuitive mobile-friendly interface for requesting emergency assistance.
- Used Firebase Authentication for secure user login and registration.

EDUCATION/ CERTIFICATION

Bachelor of Science in Computer Science

St. Clare College of Caloocan
2020-2024

Courses/Workshops

Leading to Visual Graphic Design NC III (Best in 3D Art)
2018
